Professional Summary

B.Tech Computer Science and Engineering student with skills in Python, C, and Web Development. Experienced in developing academic software projects such as BestDeals, a product price comparison website and completed a final year project named PersonaVault focused on AI-powered digital identity protection and secure data management. Passionate about software development, problem-solving, and building efficient applications with a strong interest in emerging technologies and artificial intelligence.

Education

B.Tech in Computer Science and Engineering

MES Institute of Technology and Management, Chathannoor, Kollam, Kerala

APJ Abdul Kalam Technological University (KTU)

Graduating in 2026

Key Skills

- Programming Languages: Python, C
- Web Development: HTML, CSS, Django (Beginner), React (Beginner)
- Tools: MS Excel, Git, VS Code
- Concepts: AI Fundamentals, Data Structures
- Soft Skills: Problem-solving, Communication, Teamwork, Adaptability, Time Management

Languages

- English
- Malayalam

Projects

Mini Project – BestDeals: Product Price Comparison Website

- Developed a product price comparison website that allows users to compare products between Amazon and Flipkart based on price and reviews.
- Built using HTML, CSS, JavaScript, and simple backend logic.

Final Year Project – PersonaVault: AI-Powered Digital Identity Firewall

- Developed an AI-powered platform for digital identity protection and data leak detection.
- Implemented secure authentication, OCR-based document scanning, encrypted file storage, and machine learning based anomaly detection.
- Built using React, Vite, Python FastAPI, Supabase PostgreSQL, and Django with automated monitoring and real-time alert features.

Experience

Virtual Internship – Infosys Springboard

(January 2026 – May 2026)

- Participated in a 16-week virtual internship program focused on “The Dynamic Text Analysis Platform”.
- Worked through collaborative sessions focused on project execution, practical exposure, and skill development.
- Gained experience in teamwork, project ownership, communication, and hands-on technical learning through regular virtual sessions.

Web Development Intern – Cognifyz Technologies

(April 2026 – May 2026)

- Worked as a Web Development Intern and gained practical experience in frontend development, collaboration, problem-solving, and effective communication throughout the internship.
- Completed assigned web development tasks with attention to detail and strengthened technical and learning skills.

Internship and Workshop – Python Development, CodeDesign Technologies Pvt. Ltd., Infopark Kochi

(June 2025)

- Completed a 5-day internship and hands-on workshop focused on Python Development at Infopark Kochi.
- Worked on practical coding tasks, improved programming skills, and gained exposure to real-world software development practices, debugging, and collaborative development.

Workshops – Python and Machine Learning, Neovent Innovations

(October 2024)

- Attended hands-on workshops on Python Programming and Machine Learning organized by Neovent Innovations in association with IEDC MESITAM.
- Strengthened programming logic and learned fundamental concepts of Python and Machine Learning through practical sessions and exercises.
